Professional Summary

AWS & DevOps Engineer with strong hands-on experience in cloud deployment, containerization, and automation. Skilled in leveraging AWS services and modern DevOps tools to build, integrate, and streamline CI/CD pipelines. Demonstrated practical knowledge through multiple real-world projects, showcasing technical proficiency, problem-solving ability, and a continuous drive for learning and innovation.

Technical Skills

- Cloud Platforms: **AWS** (EC2, S3, VPC, IAM, Lambda, EKS, ECS, RDS, CloudWatch, CloudTrail, CloudFront, Route 53, and more)
- CI/CD: Jenkins
- Containerization & Orchestration: **Docker, Docker-Compose, Kubernetes**
- Infrastructure as Code & Configuration Management: **CloudFormation, Terraform, Ansible**
- DevSecOps & Security Tools: **SonarQube, Trivy, OWASP Dependency-Check, Node Exporter**
- Monitoring & Observability: **AWS CloudWatch, CloudTrail, Prometheus, Grafana**
- Programming & Scripting: **Python, Bash, Groovy, YAML**
- Version Control: **Git, GitHub**

Professional Experience

AWS DevOps Engineer

Company: **Greatestway Software Pvt. Ltd.**

Duration: *July 2025 – Present*

- Architected scalable cloud infrastructure leveraging AWS resources (EC2, VPC, S3, IAM, CloudWatch) while enforcing best practices in security and cost optimization.
- Automated CI/CD workflows using Jenkins, reducing deployment times by 40% and improving release reliability.
- Enhanced monitoring capabilities with CloudWatch and CloudWatch Logs, identifying and resolving issues early to minimize downtime by 25%.
- Implemented infrastructure provisioning using IaC, achieving 3× faster deployments.

Cloud Computing Intern

Company: **Acmegrade Pvt. Ltd.**

Duration: *July 2024 – September 2024*

- Supported cloud environment deployment and management on AWS, contributing to a 30% improvement in system performance and reliability.
- Designed and implemented IaC-based automation for consistent infrastructure provisioning.
- Assisted in CI/CD pipeline setup to improve deployment efficiency and reliability.
- Applied Linux administration, Git, and cloud automation best practices in real-world project environments.

Projects

Deployment of a Java Web Application on AWS

- Provisioned and configured AWS EC2 instances with appropriate security groups for secure SSH and HTTP access, ensuring a secure and scalable environment for hosting web applications.
- Automated Java application deployments by configuring JDK, Apache Maven, and Apache Tomcat, streamlining release workflows and minimizing deployment delays by 2 hours.
- Built and packaged the Java application into a deployable WAR file using Maven and deployed it to the Tomcat server.
- Conducted comprehensive testing to validate application functionality and optimize server configurations for high availability.

DevSecOps Pipeline for E-commerce Website

- Established a secure DevSecOps pipeline for an e-commerce application, integrating security and compliance checks early in the release lifecycle.
- Optimized CI/CD pipeline execution, reducing deployment time by 60% and enabling continuous security validation at every stage.
- Integrated SonarQube for static code analysis, enforcing Quality Gates and reducing critical vulnerabilities by 40% before deployment.
- Deployed monitoring stack with Prometheus, Grafana, and Node Exporter, enhancing visibility and reducing incident detection time by 50%.
- Orchestrated containers on Kubernetes for high availability, achieving 99.9% uptime across production environments.

Education

Bachelor of Computer Applications, Sandip University, Nashik

Duration: *June 2022 – July 2025*

- CGPA: 8.5/10

Certifications

[AWS Cloud Practitioner](#) (Kodekloud)

[AWS Cloud Essentials](#) (AWS)

[AWS Developer Associate](#) (Skillsoft)

[Core Agile and DevOps](#) (Skillsoft)
